(54) Title: METHOD FOR PREPARING ORGANIC ACID

(57) Abstract: Provided is a method for producing an organic acid, which includes: mixing a compound containing one or two aldehyde groups and a solvent to obtain a reaction mixture; and maintaining the reaction mixture in a liquid phase in the presence of pure oxygen or O₂-enriched air containing 25-90% oxygen at a temperature of a 0-70.°C, under a pressure condition of an atmospheric pressure to 10kg/cm², and for 2-10 hours. The method can enhance the selectivity of the organic acid, thereby increasing the yield of the organic acid.
